*Blockchain Developer Intern* Remote
  - Developed backend and **blockchain server of SupplyX**, a decentralized **food supply-chain management system** using **Hyperledger-Fabric**, enabling real-time order-tracking and **farm-to-fork traceability**; deployed on **Docker AWS Kubernetes**, handling **1,000+** transactions/day with **fabric-ca based identity management** resulting a bounty from **State Government**.
- SentielX.Solutions** Apr 2025 - Ongoing  
*Web3 Security Researcher* Remote
  - Working as a security researcher at a Web3 security company developing a real-time protection layer for smart contracts, leveraging automated **static and dynamic analysis**, runtime monitoring, mempool scanning for **front-running detection**, and on-chain anomaly detection to safeguard decentralized applications from **exploits and vulnerabilities**.

## PROJECTS

- CryptoMilan - Proof of Attendance Protocol for Web3 events** Dec 2024  
*CoinDCX-Unfold 2024 Hackathon* Devfolio
  - Revolutionizes event engagement with **POAPs (Proof of Attendance Protocol)**. Integrating geoFencing while circumferencing the area allows attendees to collect exclusive **3d POAPs** as proof of **participation**.
  - Web3 events with **AR/AI**, unlocking rewards like discounts, **NFTs**, or **exclusive perks**. This incentivizes attendance, strengthens loyalty, and turns events into interactive and **rewarding** experiences for the **community**.
- CritiQ - Blockchain-based Review Management system** Jul 2024  
*Team BlackHats, Hack4Bengal* GitHub
  - Used **avalanche blockchain** for user & review storage, smart contract deployment and **Diamante Net** for reward distribution, **router-nitro SDK** for cross-chain liquidity migration.
  - Intregation of **genkit(llama:3b & llama:2b)** for review authenticity and **callchimp-ai** for customer-centric AI based 24/7 calls.
- Suiza - Fitness Platform developed on the Sui Blockchain** Jan 2025  
*Developed for Sui typhoon* GitHub
  - Engineered a privacy-preserving fitness protocol using **zkCircom** circuits on the **Sui** blockchain, enabling **selective health data disclosure** via **zero-knowledge proofs** with on-chain **commitment** and off-chain storage.
  - Integrated AI agents (**Eliza**) with real-time Fitbit data and Move-to-Earn smart contracts, powering personalized **holographic training**, **ZK-verified** rewards, and immersive social fitness engagement.
- ChainTune - Decentralized Music Platform on Aptos** Feb 2024  
*Aptos Winter School* GitHub
  - Designed and deployed Move smart contracts on Aptos to enable **NFT-based music releases**, **automated royalty distribution** to listeners, and artist **staking mechanisms** with listen-count-based **refund logic**.
  - Integrated **on-chain identity**, community access, and playback-linked reward systems, leveraging **IPFS** for decentralized media storage and smart contract hooks for fan-gated privileges and **loyalty** incentives.
